A 4" version of the PR 30. Same wide response, same marvelous Heil pattern, same -40 dB of rejection that is becoming THE 'go-to' microphone for every application. You will want to read more about Bob Workman's PR 31 BW.

PR 31 BW

We at Heil Sound continue to listen to the artists and engineers that use our microphone products. We listen about how well they work but also like to know of any improvements or product ideas artists and engineers may have as they travel the globe.

The PR 31 BW was a suggestion of Bob Workman FOH Engineer for Charlie Daniels who uses Heil microphones exclusively. Bob uses the Heil PR 30 for just about every application but it was too large physically to fit in and around the drum kit so Bob suggested we 'cut it in half'. That is exactly what we did and the PR 31 BW was born – a 4" PR 30 that exhibits all specs of the PR 30. Same great frequency response, same wonderful front pattern and the incredible – 40 dB of rear and side rejection which is perfect for using the PR 31BW as an UNDERHEAD microphone for cymbals.

Placing a microphone under the cymbal has never been successful because the microphone hears everything around it. With the –40 dB of rear and side rejection of the PR 31 BW, the microphone does not hear anything but what it is pointed towards – in this case, the cymbal and nothing from the toms or other sounds close by.

Using a right angle connector and our HH-1 rim mount, the PR 31BW is the perfect low profile answer for toms. The PR 31BW also works great in front of a guitar cabinet, the best brass horn and saxophone mic, inside a Leslie speaker and is perfect for acoustic pianos. It is your best 'go-to' microphone for just about everything, including vocals.

This incredible little bombshell is rightfully named, the HEIL PR 31 BW in honor and thanks to Bob Workman

Output Connection	3 pin XLR
Element Type	Dynamic
Frequency Response	40 Hz - 18 kHz
Polar Pattern	Cardioid
Rear Rejection @ 180° off axis	-40 dB
Impedance	370 ohms balanced
Output Level	-52.9 dB @ 1 kHz
Weight	5.5 oz.
Max SPL	146 dB

!!! ATTENTION !!!
This is an END - FIRE microphone. Audio is acquired from the END of this microphone, NOT the side.
